

360° Beyond WorkLife provides an extraordinary cost-effective platform

to manage your inactive\* population in Employee Central.

The solution is simple to use, providing the inactive population easy access to their information with the ability to update details throughout the year. For the Administrator, it alleviates tedious and trivial processes that get in the way of more important work. Changes in inactive population information are received securely for review and update. HR Administrators can also utilize the 360° Beyond WorkLife platform as a tool for communication with their inactive population.

*\* Inactive population could include retirees, furloughed employees, laid-off employees, terminated employees, etc.*

## Features

### Self Service Portal

The self-service portal is a platform providing access to inactive population to view and update information without additional licensing costs.

### Communication

Keep your inactive population informed and engaged by using the collaboration tool within the platform.

### Configuration & Design

The platform is easy to configure to your unique organizational goals, identity and branding.

### Mobile and Desktop

Inactive population can access and manage their relevant information from their desktop computers or on-the-go on their mobile devices - compatible with iOS & Android.

### Easy to Use

Effortless viewing and capturing of inactive population information through mobile or desktop devices.

### 100% Secured

Our secured and encrypted database servers on AWS managed platform performs daily snapshots and weekly backups on encrypted databases.
