

Refresh as a Service:

Flexible SAP Data Refresh Solutions

Refresh as a Service (RaaS) is a managed refresh service from EPI-USE that allows SAP clients to either purchase a package with a specialized number of refreshes or order client refreshes or builds as needed.

Data refreshes span a number of modules, including SAP HCM, ERP, BW, CRM, SRM, SCM, and GTS.

Explore our data refresh services

Build a new standalone SAP system	Refresh an existing client when you want to	Provision a new client for a specific project
Refresh your training system daily, weekly, or monthly as needed	Build directly in the cloud if you don't have the hardware but need a temporary client	Copy and refresh specific objects or groups of data
	Scramble data across platforms such as ERP & CRM	

Benefits of a data refresh

- + Access to the most up-to-date data
- + Improved system performance
- + Better experience for end business users
- + Safely test applications with production data

Copy and mask data with the Data Sync Manager (DSM) Refresh Package

The EPI-USE Labs Data Sync Manager (DSM) product suite lets you rapidly create new non-production systems, reduce the footprint when refreshing existing test clients or creating new ones, and copy selected data on demand.

- + Our specialists can help you manage and transform your SAP landscape with their in-depth understanding of Data Sync Manager
- + The newest functionality and execution options are always employed on your SAP system for the best possible results
- + EPI-USE follows global best practices to solve your most pressing challenges amid changing industry trends
- + Choose the length of package that best suits your needs – whether ad-hoc refresh or ongoing service

About EPI-USE

EPI-USE operates in 40 countries and has been an SAP partner for over 40 years, with clients ranging from multinationals to rapidly growing startups to public sector clients. An advanced AWS Partner and SAP Gold Partner, EPI-USE excels in implementing, migrating, and managing SAP in the cloud, leveraging its SAP-certified accelerators and toolsets. As of early 2023, EPI-USE has over 100 AWS Certifications, 15 Professional/Specialty Certifications, 64 Associate Certifications, and 34 Cloud Practitioner Certifications.
