

Modernize your SAP environment  
by migrating to **AWS**

Are you considering migrating your SAP® workloads to AWS? The benefits of SAP cloud transformation on AWS are clear: your organization can reduce the risks and costs of migration, while simplifying the integration of new technologies and ensuring compliance with current regulations and security best practices.

EPI-USE makes it all possible. From low-cost infrastructure to on-demand scaling, to flexibility and reduced downtimes, cloud transformation allows your company to take on your industry's challenges competitively with cutting-edge solutions.

## What we do

The infographic consists of seven grey rectangular boxes arranged in two rows. Each box contains an icon, a title, and a short description of a service.

- Top Row:**
  - AWS Managed Support:** Icon of a sun and gear. Text: "After a client goes live with AWS, they still need to support the environment. EP-USE has the team, tools, and automated systems to support enterprises' AWS environments."
  - Desktop-as-a-Service:** Icon of a laptop with a graph. Text: "To meet the increasing demands of clients and the expanding mobile workforce, organizations of all sizes are moving toward an always-connected workplace."
  - Cloud Migrations:** Icon of a cloud with an upward arrow. Text: "AWS migration services are fast, convenient and cost-effective."
  - AWS Well-Architected:** Icon of a server rack with a sun. Text: "A Well-Architected Framework is a set of core strategies and base practices for architecting systems in the cloud. A WAF review (not audit) is a low friction way to engage with an existing AWS client."
- Bottom Row:**
  - Billing as a Service:** Icon of three dollar signs and an arrow. Text: "Allow us to manage your AWS spend. We can usually save you up to 20%."
  - SAP on AWS:** Icon of puzzle pieces. Text: "Deployment, hosting and managed services of SAP systems."
  - Windows on EC2:** Icon of a microchip. Text: "In EC2 and RDS; you can take advantage of the Microsoft/AWS partnership by launching pre-configured Windows Server and Microsoft SQL Server instances."

## SAP Cloud Migration Services to AWS

Our SAP AWS Cloud migration services deliver better productivity, process and systems agility, with operational resilience. Together with our SAP AWS experts, we complement the migration service with the added value of AWS and EPI-USE SAP-certified accelerators and toolsets. Whether you are just migrating your SAP workload to AWS, including inflight upgrades, or converting to S/4HANA, EPI-USE will rationalize and secure your new AWS SAP landscape, saving you money and reducing risk. With our tried and tested SAP AWS migration methodology, we will enable you to:

- Select and migrate only the relevant SAP data to AWS
- Reduce the size of non-production systems and dramatically save on runtime costs
- Secure any sensitive data in non-production environments
- Save time and cost on your overall SAP AWS migration project.

Additional benefits:

- Data center consolidation saves overhead costs
- Digital transformation gives your organization the flexibility to adopt new technologies as needed
- Outsourcing hardware/software allows faster implementation as well as savings in costs that would normally accrue for upgrades
- Mergers and acquisitions can be conducted and integrated smoothly.

## SAP AWS Managed Support

As an Advanced AWS Partner and SAP Gold Partner, EPI-USE provides powerful SAP AWS Managed Support that ensures you have the flexibility, scalability, and reliability that you need. We provide a robust end-to-end AWS and SAP Managed Services solution across all SAP systems, with a highly personalized level of service. Our services and solutions include:

- Full AWS and SAP IP-leveraged Managed Services, including 24/7 remote services
- Monitoring and housekeeping on AWS platform and SAP stacks
- Break fix, incident and change ticket resolution measured against an SLA
- Availability uptime (SLA), disaster recovery and high availability options
- Operating System, database and SAP system patching
- Proactive AWS and SAP process and setup improvements
- Secure services and environment backed by ISO27001 certification
- Specialized AWS cost optimization to drive down your ongoing operational costs.

## SAP-certified software to accelerate the journey

### Application Sunsetting

Archive Central™ allows for ongoing access to data extracted from a legacy SAP system without expensive archiving processes. Easily comply with data privacy and security regulations using the ISO 27001-certified platform. With read-only access, users can browse, filter data through controlled access to structured and unstructured stored data, and even create reports and dashboards in this highly searchable platform. Archive Central is the ideal solution to the problem of future access to legacy data.

Archive Central is an excellent solution for access to legacy data for:

- Greenfield / selective migrations
- Retirement of systems
- Mergers and acquisitions
- Archiving for non-SAP use
- Cold storage

---

### Test Data Management

With our Data Sync Manager™ suite, you have a complete solution for all your test data management needs. It's the simplest, most effective way to copy and mask data between and within any SAP ABAP stack landscape. Masking sensitive data reduces risks, and you can cut storage space by as much as 80%.

- Refresh data on demand
- Save costs, with less downtime, and lower disk space usage
- Reduce time spent recreating production issues
- Empower your functional team to manage their own test data

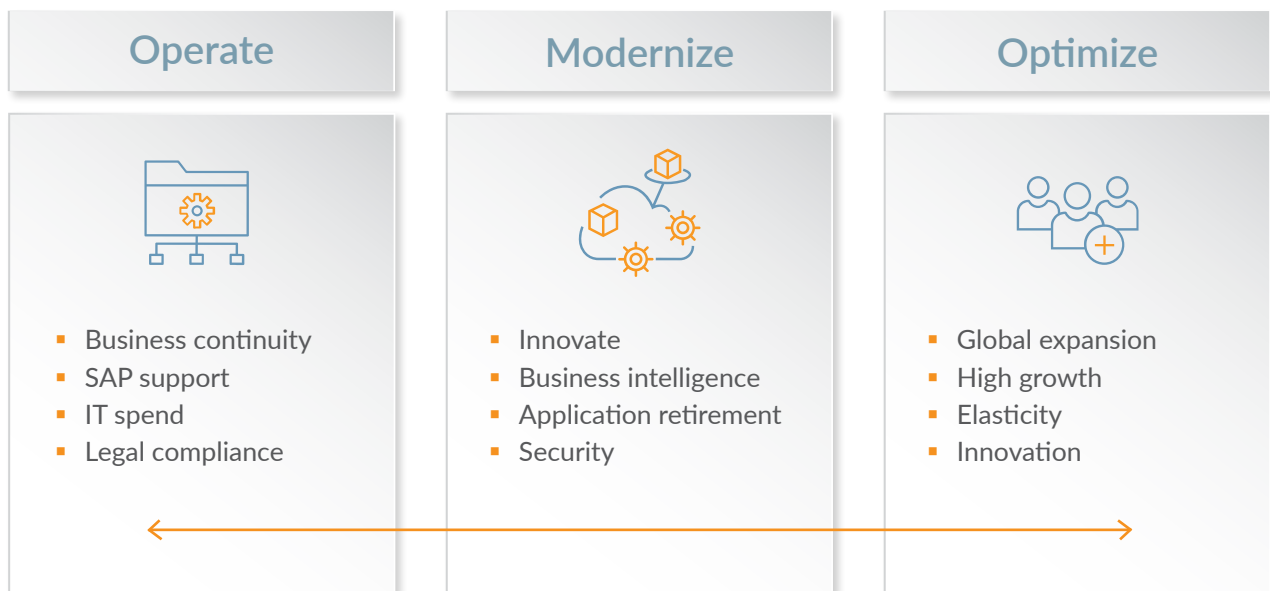

## Data Protection and Compliance

Data protection and compliance often requires multiple layers of security measures and various access requirements, especially in highly regulated industries. Businesses must maintain compliance with data privacy legislation such as GDPR, state regulations, industry requirements, and more.

With the Data Privacy Suite for SAP solutions, you'll have all the tools you need at your disposal:

- Data Secure – rule-based, conditional and consistent anonymization of data through your non-production environments
- Data Redact – intelligently remove or replace sensitive data
- Data Retain – proactive identification of data subjects eligible for removal
- Data Disclose – central reporting tool for highlighting sensitive data across your SAP portfolio

## The business problems we solve

Are you ready to speed up your testing, reduce your manual workload, protect sensitive data, and reduce your costs by migrating your SAP workloads to AWS?

Let EPI-USE support you through the process so you can reap the benefits, starting today.
