pre-delivered reports

13,000+ data sources
delivered

80% reduction in
report creation time

Easy access to reports
from all devices

Simple drag-and-drop
interface

Why is reporting such a big challenge for SAP HR and Payroll?

It can be challenging getting easy access to – and reporting on – your SAP® and SAP SuccessFactors® HCM and Payroll data. Not only do you need multiple tools to report on your highly-sensitive data; you may need to rely on specialist IT resources to create or run reports, or even outsource your reports. Your critical data may not be available in SAP Business Warehouse (BW). Also, you might be in a hybrid scenario, using some SAP and some SuccessFactors modules, and needing to report on data from both systems at the same time.

Building reports yourself is time-consuming; and standard reports have none of your corporate branding. On top of this, you may move data out of SAP to manipulate it in Microsoft Excel, which brings significant risks.

Solve all your SAP HR and Payroll reporting challenges

Query Manager™ is a powerful solution that enables you to create custom reports, send automated communications, push content to analytics products (like Power BI or Tableau) and integrate with Microsoft Excel. By combining data from on-premises SAP and SAP SuccessFactors, Query Manager gives you one solution for all your SAP reporting needs. It's a comprehensive solution that will journey with you to the cloud, from SAP HR & Payroll and SAP SuccessFactors Hybrid to Employee Central Payroll.

The Query Manager Add-on solutions can also help you achieve maximum ROI for your investment, both on-premises and in SAP SuccessFactors. Query Manager is certified by SAP for 'Integration with RISE with SAP S/4HANA Cloud'.

SAP Certified
Integration with RISE with SAP S/4HANA Cloud

Extract and visualize SAP SuccessFactors and Employee Central Payroll data

Approximately 1,600 SAP customers are currently licensed for SAP SuccessFactors Employee Central Payroll (ECP). Whether you migrated from on-premise SAP Payroll, or simply deployed ECP, you'll need to report on your Payroll data. Query Manager offers:

- Live reporting for Payroll data: on-premise Payroll and SuccessFactors ECP
- Live integration with visualization tools such as SAP Analytics Cloud and Microsoft Power BI.

Query Manager is both certified by SAP S/4HANA and listed on the ECP Whitelist for live Payroll reporting. ECP data is not yet available within People Analytics. If you wish to report on data that is unavailable today, or not scheduled for inclusion at release – like Payroll reporting or on-premise HCM data – you can use Query Manager.

Query Manager has transformed our HCM reporting. Our HR colleagues are using it to get some really rich data out. For our management team, all of our sickness and performance reporting comes from Query Manager; it has good graphical reports and visual representation.

Enhance your solution with Query Manager Add-ons

Report on data from SAP and SuccessFactors at the same time

Integrate with your analytics solution (SAP Datasphere, MS Power BI, etc.)

Create your own professional reports and documents

Work in and share your data via Microsoft Excel

Interact with your reports and documents via a web browser

With Query Manager, it's like Steve Jobs said: 'It just works'. It does exactly what you want it to do. It is a reporting tool, but it has additional functionality that standard SAP reporting tools don't have.

Gary Midgely, the BBC

Why choose Query Manager?

Query Manager with Document Builder: certified by SAP for Integration with SAP S/4HANA® 	 Up to 40% reduction in payroll processing time	 Create professional documents yourself without technical resources	 Speed up reporting with pre-built catalog of reports
250+ ready-to-use pre-delivered reports 	Work with your SAP HCM data on-demand in Microsoft Excel	Visualize your data with impressive designs	
Access all your SAP and SuccessFactors data from a single solution 	Access and analyze accurate, real-time data securely	Interact with your reports and documents via a web browser 	 Integrated with SAP Analytics Cloud
80% reduction in report creation time 	13,000+ data sources delivered	Virtually any data source available	Simple drag-and-drop interface
Integrate with your analytics solution 	Easy access to reports from all devices 	No ABAP coding needed 	Check data replication errors
		Compare legacy HR and Payroll data in real time 	

I am blown away. (Query Manager) takes any and every variable in SAP, and can mash it up to a depth that is needed on my job. What I need it for is to dig into the depths of SAP for anomalies that I know lurk in bad data.
